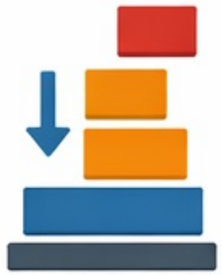
Abstract Data Types (ADTs)

Stack



- push(item)
- pop()
- peek()
- isEmpty()

Queue

- enqueue (item)
- dequeue()
- front()
- isEmpty()

Deque

- addFront(item)
- addRear(item)
- removeFront()
- removeRear()

List

- insert(pos, item)
- remove(pos)
- get(pos)
- size()

Priority Queue

- insert(item, priority)
- extractMax()
- extractMin()

Map (Dictionary)

- put(key, value)
- get(key)
- remove(key)
- containsKey(key)

Set

- add(item)
- remove(item)
- contains(item)
- union(), *intersection*()
