CSIS 27 Java Programming II
Spring 2026 Syllabus

Instructor: Dr. Manny Kang

Email: mkang@gavlilan.edu

Phone: (408) 413-9800

Course Title: Java Programming II

Section Number: 301

Units: 3 units

Location: Online

Duration: 02/23/2026 – 05/22/2026

Online Virtual Office zoom hours: 7:00PM -10:00PM Monday - Tuesday (First make appointment with above phone (408)413-9800 text message or email: mkang@gavilan.edu) with appointments: Zoom link: **https://gavilan-edu.zoom.us/j/85107036232** .

Additional Optional Online Zoom additional Office/ Lab Hours: 01:00PM-05:00PM Fri (Online) and Online by appointment in Zoom

- **Note:** This is an online asynchronous class. You should be self-learning from weekly text-based lecture notes and lab programming examples. You are responsible in understanding technical lecture notes, lab assignments, and other weekly work and spend at least 10 hours to complete weekly work. I am here to help you and you can contact me using above different communication methods.

Catalog Description: This course is a continuation of Java Programming I, intended for students majoring in programming and/or planning to transfer to a 4-year college or university. This course will cover topics discussed in Java Programming I in more detail. Emphasis will be placed on implementation and analysis of algorithms and abstract data types: lists, queues, stacks, arrays, trees, priority queues, heaps, tables, hashing, balanced trees, graphs, searching and sorting, and recursion. (C-ID: COMP 132)

PREREQUISITE: CSIS 24 Java Programming I or equivalent experience.

Student Learning Outcomes:

1. Discuss the representation and use of primitive data types and built in data structures.
2. Describe and demonstrate how the various data structures are allocated and used in memory.
3. Describe and utilize common applications for a variety of data structures.

(Please see the course outline at http://www.gavilan.edu/curriculum/course_outlines/)

Texts & Materials:

Frank M. Carrano and Timothy M. Henry. Data Structures and Abstractions with Java (5th Edition). Pearson,2018. ISBN: 0134831691

Other Materials

- Access to the internet.
- Geany Java Compilier : You can download and install https://www.geany.org/
- You can obtain a free copy of the Java JDK from Oracle. You must have the Java compiler (JDK) on your computer if you plan to work on your own computer.
- Computer with a working camera and microphone with enough RAM to run the Google Chrome browser.
- Fairly recent Mac or PC (not more than three years old) with a current operating system
- Current browser (Firefox or Chrome are preferable)
- This class consists of text-based lectures and lab—programming exercises which you will do on your own computers. You may work on assignments in the lab at Gavilan College or use your own computers.

- **Assignments**: All assignments including the class syllabus (this) will be stored at http://ilearn.gavilan.edu. Your grade is based upon the assignments completed. When you complete all assignments, you have completed the course. One chapter from the required textbook will be covered every week. Every week several programming assignments will be given for each chapter. All assignments are due a week after they were assigned.

- **Discussions , homework, quizzes, or tests** all work will be posted on canvas and submitted at 11:59 pm due date.
- **Students must complete and submit** 6 quizzes, two tests (Test1 & Test 2) , final exam , and at least 50% of labs in order to pass the class with "C" grade.
- **Late Policy:** If you need extra time, you must text me message me **before** the deadline.
- **Make Ups:** Make ups will only be permitted in tests, if student notifies instructor **before** scheduled event. There is no makeup for quizzes.

- **Attendance Policy :** Students must do the following in order to stay in the class:

  - Log in to the Canvas course within the first week.
  - Complete these assignments by 03/01/2026
    - Required Assignment 1
    - Quiz
    - Participate in Discussion

Students are expected to attend all sessions of each class. Instructors may drop students from class if they do not logging into the class in Canvas for more than a week. Excessive absences (not logging into the class in Canvas for more than a week) may lead to disqualification

(being dropped) from a course by the instructor. A student who simply stops attending without formally dropping may receive an unsatisfactory grade and may be required to repay financial aid funding.

Note: It is the ultimate responsibility of the student to drop from a course; do not expect an instructor to know your intentions. You may drop on the Self-Service system or by completing the proper forms in the Office of Admissions and Records. To be eligible for a refund of fees and/or prevent a recorded grade of F, FW, or W, you must drop the class on or before the posted date.

Grading

	Points	Percentage
Programming Labs	200	20%
Weekly Discussions (Discussions) and Online Attendance	200	20%
Weekly Quizzes	100	10%
Tests (two)	200	20%
Final (one)	300	30%
Total	1000	100%

The work on the tests and exercises will be weighted and combined to calculate your final grade as follows:

Grade Scale

Total Percentage	Grade
90 – 100%	A
80 – 89%	B
70 – 79%	C
60 – 69%	D
0 – 59%	F

Course Grading Method
You can click on the class in canvas at http://ilearn.gavilan.edu. to see your current grade.

Student Responsibilities: Since this is online class , you are expected to log into the class page at least three times every week This is how I will measure your attendance. You are also expected to keep up with the assignments and will need to spend at 10 hours every week working on this class. If you disappear and stop turning in assignments, I may drop you**.**

ADA Accommodation Statement: Students requiring special services or arrangements because of hearing, visual, or other disability should contact their instructor, counselor, or the Accessible Education Center (AEC) to make arrangements ASAP.

Occupational/Vocational Statement: Limited English language skills will not be a barrier to admittance to participation in Vocational Educational Programs.

Student Honesty Policy Reference Statement: Students are expected to exercise academic honesty and integrity. Violations such as cheating, and plagiarism will result in disciplinary action which may include recommendation for dismissal.

Artificial Intelligence Statement:

Statement Regarding Generative Artificial Intelligence (AI)
The World Economic Forum defines generative AI as "a category of artificial intelligence (AI) algorithms that generate new outputs based on the data they have been trained on. Unlike traditional AI systems that are designed to recognize patterns and make predictions, generative AI creates new content in the form of images, text, audio, and more."
Some examples of generative AI tools include but are not limited to: ChatGPT, Google Bard, Microsoft Copilot, Stable Diffusion, GrammarlyGo, and Adobe Firefly.

No Generative Artificial Intelligence (AI) Allowed
In this class, all work submitted must be your own. The use of generative AI tools will be considered academic misconduct and will be treated as such. If you are unsure if the tool or website you are using is a generative AI tool, please contact the instructor for further clarification before using the tool or website.

Test1: March 24, 2026

Test 2: April 21, 2026

Final Exam: May 19, 2026

Tentative Schedule

Week	**Topics**	**Assignments**
Orientation Unit	Get started	1. Tech Task: Login to Canvas 2. Get familiar with Orientation module 3. Participate in Discussion: Meet and Greet

1 (Feb 23-Mar 01)	Software Life Cycle, ADT vs Data Structure ; Encapsulate, Abstract Data Type (ADT) "Bag"	Weekly Discussion, lab assignment , and quiz
2	Stacks (LIFO) and Queues (FIFO)	Weekly Discussion, lab assignment , and quiz
3	Linked List & Circular List	Weekly Discussion, lab assignment , and quiz
4	Double-Linked/Ended List (Priority Queues)	Weekly Discussion, lab assignment , and Test 1
5	Recursion, Sorts: Bubble, Select, Insert Merge Sort	Weekly Discussion, lab assignment , and quiz
6	Advanced Sorting (QuickSort, ShellSort)	Weekly Discussion, lab assignment , and quiz
7	Binary Trees; Heaps	Weekly Discussion, lab assignment , and quiz
8	Hash Tables	Weekly Discussion, lab assignment , and Test2
9	Graphs: DFS and BFS	Weekly Discussion, lab assignment , and quiz
10	When to use what Data Structure	
11	Review	
12	Final Exam (May 19,2026)	

Spring 2026 Important Dates

January 26	First Day of Instruction
February 9	First Census
February 13, 16	Holiday (President's Day)
March 31	Holiday (Cesar Chavez Day)
April 6 - 12	Instructional Spring Break
May 18 - 22	Final Exams
May 22	Last Day of Semester
